Summary

I am a full stack web app developer with React, Nextjs, Node.js, and MongoDB skills. I have over two years of experience in building dynamic and responsive web solutions. I love working on creative and challenging projects and learning new technologies.

Work History

Sentimental-chat (web-app)

May 2024 - May 2024

- Chat application that incorporates sentiment analysis to analyze the sentiment of the messages exchanged between users. It provides insights into the emotional tone of the conversations.

Mern-AUTH (web-app)

March 2024 - March 2024

- Developed a comprehensive authentication system using the MERN stack (MongoDB, Express.js, React, and Node.js), incorporating JSON Web Tokens (JWT) for secure user authentication. Utilized the Redux Toolkit to efficiently manage state across the application, ensuring seamless integration and a robust, scalable solution for user authentication and authorization.

foodyLife (web-app)

December 2023 - January 2024

- Made a web app that is streamlined and user-friendly experience for managing recipes and exploring culinary delights. Learned how to design a flow diagram for my approach in accordance to MVC architecture.

Frontend Lead (Online Hackathon Champion) at Bay Area Hacks Society (Bay Area, San Francisco - online)

February 2023 - February 2023

- Collaborated with the team to create a social media platform for developers, tested and modified programs and databases, designed and implemented software applications, modernized code bases, and developed an award-winning web app within 30 hours.
-
